

Jean G. Borges

Junior Full Stack Developer | TypeScript | React | Node.js

Porto Alegre, RS | +55 49 99108-8198 | comscijb@gmail.com | github.com/comscijb | jeanborgesdev.com

PROFESSIONAL SUMMARY

Full Stack Developer focused on TypeScript, React and Node.js, currently in the final semester of a B.Sc. in Computer Science, with graduation expected in December 2026. Since early 2026, I have been building web applications and independent projects with React, NestJS, PostgreSQL and REST APIs. My main project is ConstruiQ, a B2B marketplace with authentication, role-based access, contracts, payments and other business workflows. English C2 certified by EF SET.

TECHNOLOGIES

Frontend: React, TypeScript, JavaScript, Vite, HTML5, CSS3, Chakra UI, React Query, React Hook Form

Backend: Node.js, NestJS, Express, REST APIs

Data and testing: PostgreSQL, Prisma, Jest, Vitest, Testing Library

Cloud and tools: AWS, AWS CDK, Docker, Git, GitHub, Stripe

PROFESSIONAL EXPERIENCE

Full Stack Developer | Independent Projects | Jan 2026 - Present

- Built web applications and websites with React, TypeScript and Node.js, covering frontend, backend, data persistence and external integrations.
- On ConstruiQ, implemented authentication, user roles, job postings, applications, contracts, payments, ratings, disputes and KYC workflows.
- Worked with PostgreSQL and Prisma, Stripe integrations, automated tests, Docker and AWS infrastructure with CDK.

Music Producer | Self-employed | Aug 2015 - Mar 2026

Managed client projects from initial requirements through final delivery, including negotiation, scheduling and project follow-up.

Maintenance Technician Trainee | Azul Brazilian Airlines | Aug 2012 - Oct 2014

Worked in a technical environment following maintenance procedures, safety standards and team-based operational routines.

SELECTED PROJECTS

ConstruiQ | Full Stack B2B Marketplace

React, TypeScript, NestJS, PostgreSQL, Prisma, Stripe and AWS. Marketplace for construction industry hiring, with authentication, role-based access, job postings, contracts, payments, ratings, disputes, KYC and administrative workflows.

Lead Scoring App | Full Stack Application

React, TypeScript, Node.js, Express, PostgreSQL and Prisma. Application for capturing, scoring and prioritizing sales leads, with backend scoring rules, pipeline status management and dashboard metrics.

EDUCATION & LANGUAGES
